(leg of lamb/cured ham)

Sandwich & baking paper

Soil from herbs

Cigarette butts & snus tobacco

Chewing gum

Soil/earth

Flowers & plants

Twigs & leaves

Plastic pots for herbs

Stones & gravel

1

- Dispose your food waste in the green bio bag. Use a waste bin with ventilation holes and only one bag at a time.
- Feel free to throw away any paper towels or napkins you have used, together with the food waste. It helps absorb moisture.
- Tie the bag and throw it in the food waste container.

2

We collect the food waste and bring it to Verdal, where it is converted into biogas and biofertiliser!
